

Year Seven Revision List: End of year Exam

1. Four operations of number add subtract multiply and divide
2. Use of calculator
3. BIDMAS
4. Directed numbers: Be able to add subtract multiply and divide positive and negative numbers.
5. Decimals
6. Coordinates in all four quadrants
7. Angle Properties including angles and parallel lines
8. Properties of Quadrilaterals and triangles
9. Simplifying algebraic expressions
10. Compare fractions decimals and percentages including equivalent fractions
11. Factors and Multiples including HCF and LCM , prime factor trees.
12. Fractions: addition subtraction multiplication and division
13. Rounding to a number of decimal places and significant figures
14. Area and perimeter including rectangles triangles trapezium and parallelograms compound shapes and circles.
15. Indices
16. Pythagoras' theorem
17. Linear Equations: forming and solving equations

Everything that you have done in Maths since September

Year Seven Revision List: End of year Exam

- 1 Four operations of number add subtract multiply and divide
- 2 Use of calculator
- 3 BIDMAS
- 4 Directed numbers: Be able to add subtract multiply and divide positive and negative numbers.
- 5 Decimals
- 6 Coordinates in all four quadrants
- 7 Angle Properties including angles and parallel lines
- 8 Properties of Quadrilaterals and triangles
- 9 Simplifying algebraic expressions
- 10 Compare fractions decimals and percentages including equivalent fractions
- 11 Factors and Multiples including HCF and LCM , prime factor trees.
- 12 Fractions: addition subtraction multiplication and division
13. Rounding to a number of decimal places and significant figures
14. Area and perimeter including rectangles triangles trapezium and parallelograms compound shapes and circles.
15. Indices
16. Pythagoras' theorem
17. Linear Equations: forming and solving equations

Everything that you have done in Maths since September
